INSTRUCTIONS FOR 24-HOUR URINE COLLECTION

Start collection in the morning, after emptying the bladder at the usual time (for example 7 a.m.) and, from that moment onwards, collect all subsequent urine during the day and night until the same time the next day

It is important to absolutely not lose any of the secreted urine.

Always close the container well. During the day, keep it at a temperature lower than 8°C.

NAME SURNAME

DATE OF BIRTH

QUANTITY OF COLLECTED URINE: mL

WEIGHT OF THE PATIENT: Kg

HEIGHT OF THE PATIENT: cm

TO BE DELIVERED TO THE LABORATORY WITH THE URINE
